Forecast for Friday 23 Sep 2022

Weather: Some patchy low cloud and drizzle lingering across summits at first, along with some mist and fog patches, however this clearing quickly in the morning sunshine. Scattered cloud through the afternoon with a risk of the odd shower before becoming drier later. Feeling fresher than of late in a northerly to north-westerly breeze.

Chance of cloud-free hill tops above 600m: 70% increasing to 100%

Low cloud and visibility: Some of the summits will see some low cloud/fog through the morning, with bases of 300-400m as the front clears away. Very poor visibilities within any fog. For the rest of the day the cloud should remain above the summits. Moderate visibilities expected within any showers. Very good visibilities expected otherwise, with good air clarity, allowing distant hills to be seen.
